The SIDE RAILS are secured to your truck with a set of "Stake Pocket Bolts" specifically designed for your make and model of truck. These bolts mount into each of the two front and rear stake pockets. The SIDE RAIL assembly sits on the bed rails of your truck and is secured to these Stake Pocket Bolts. If your truck has a BEDLINER we suggest you remove it to install the Stake Pocket Bolts

STANDARD
SIDE RAIL KIT

TOOL BOX
SIDE RAIL KIT

FOR MORE INFORMATION SCAN HERE!

1

Insert stake pocket bolt, fasten as shown with supplied bolt plate, washers and nuts.
Make sure the stake pocket bolt tabs are correctly seated in slot on truck bed.
Hand tighten until final step.

2

Install rear stake pocket bolt inside pocket. Hand tighten the bolt with lock washer and washer as shown.

3a

****FOR 5.5' & 6.5' Beds Only****
Place the rails onto the truck locating over the stake pocket bolts, the rail can be temporarily hand tightened in place, or held firmly in place while marking. Mark the location of the square hole. Using a hand drill, carefully drill the center of the marked position with a 1/8" drill (pilot hole). Finish drilling rail with a 1/2" drill and de-bur the hole

3b

****FOR 8' beds only****
Attach the center clamp to the side rail with the supplied bolt and washers. Leaving the clamp loose, place into the center stake pocket. Hand tighten, the clamp should rotate in the pocket and hold on the underside of the pocket.

4

Place side rail over the stake pocket bolts (6.5ft) . Hand tighten all bolts. Align side rail against inside and front of truck bed. Torque all bolts. Snap trim cap into rear square hole.

NOTE:
Illustration shows standard side rail kit, follow same procedure for tool box kit.
