NOTICE

Visit www.curtmfg.com for a full-color copy of this instruction manual, as well as helpful videos, guides and much more!

Before you begin installation, read all instructions thoroughly.

Proper tools will improve the quality of installation and reduce the time required.

This installation requires:

- Bumper fascia trimming.

Periodic inspection of the trailer hitch should be performed to ensure all mounting hardware remains tight and structural components are secure.

To help prevent damage to the product or vehicle, refer to the specified torque specifications when securing hardware during the installation process.

SAFETY INSTRUCTIONS

Safety glasses should be worn at all times while installing this product.

ASSEMBLY

Parts List

Item	Qty	Description
1	1	Trailer hitch
2	1	Carriage bolt, 1/2" - 13 x 2", grade 8
3	4	Hex bolt, M8 - 1.25 x 40, cl 10.9
4	1	Serrated-flange nut, 1/2" - 13
5	4	Conical-toothed washer, 3/8"
6	1	Spacer, 2.00" x 1.50" x .25"

Step 1

Remove lower fascia panel by removing 2 push fasteners from the bottom of the vehicle, 1 push fastener from the middle of the bumper cover inside the bumper, and 1 screw from each end of the panel.

Step 2

Remove the bottom 2 M8 bolts from each bumper beam connection to the vehicle.

Step 3

Raise hitch into position and loosely secure with included M8 bolts and serrated conical toothed washer.

Step 4

Install 1/2" carriage bolt through hitch then vehicle recovery loop, then spacer and secure with serrated flange nut.

Step 5

Torque M8 hardware to 23 ft-lbs and 1/2" hardware to 90 ft-lbs.

Step 6

Trim bumper panel using trim diagram for reference and reinstall by reversing step 1.
